

The P R E F A C E.

MY Profession obliging me to be conversant with Mathematical Books; (the Printing whereof, and Music, have been my chiefest Employment) I have observed two Things, many times the Cause why Books of this Nature appear abroad not so correct as they should be; either, 1. Because they are too much hastened from the Press, and not Time enough allowed for the strict and deliberate Examination of them; which in all Books ought to be done, especially in these, for as much as one false Figure in a Mathematical Book, may prove a greater Fault than a whole Word mistaken in Books of another Kind. Or, 2. Because Persons take Tables upon Trust without trying them, and with them transcribe their Errors, if not increase them. Both these I have carefully avoided, so that I have Reason to believe (and I think I may say without Vanity) there never were Tables more exactly printed than in this Book.

The PERPETUAL ALMANACK was the ingenious Invention of that Improver of Arts, and Encourager of Artists, Sir SAMUEL MORELAND.

In the former Editions of this Book, I only inserted the first three Tables for finding the Day of the Month; but in this I have added five other Tables, for finding the Moveable Feasts and Terms for any Year past, present, or to come.

I have also in this Edition added Directions relating to the Measuring Land, the Principal Fairs in England and Wales, a Table of the Sun's Place. Monthly Directions relating to Gardening. The Reduction of English Money, with the Weight and Value of divers Foreign Gold and Silver Coins; enlarged the Table for casting up of Money, as likewise those for Interest, Rebate, and Annuities; and whereas, in the former Impressions the Parts of a Penny were expressed in Decimal Fractions, I have reduced them into Farthings, which though they cannot be so exact, yet are more easy to be understood, and do not differ from the Truth half a Farthing; as also a Table for the casting up of Portugal Money, now current here, likewise, for Guineas and half Guineas. The Roads which were very deficient, are now compleat, and put in a better Method than any yet extant, the County and Hundred, Lath, Ward or Wapentake, being added, whereby may be seen through what Counties each Road lies, and through what Divisions of such Counties; and lastly, I have added a Catalogue of all the Counties, Cities, Corporations, and Borough Towns in England and Wales, with the Number of Knights, Citizens, and Burgesses, chosen to serve in Parliament.

To conclude you will find nothing in this Book but what is very useful; according to the Truth of which, you may approve or dislike the Endeavours of,

Your Servant,

John Playford.

The even Hundreds are to be found at the Top of the Table, having their Dominical Letters over them, as 1700, 2100, have C; 1800, 2200, E, &c. The Parts of every Hundred are to be found in the Side, and have their Dominical Letters against them, as 1, 29, 57, 85, have B, D, F, or G; 2, 30, 58, 86, A, C, E, or F, according to which Century of Years they belong; and so for the rest. To find the Dominical Letters for even Hundreds and Parts, the Rule is; Seek the Hundreds in the Top, and the Parts in the Side, and in the Angle of Meeting is the Dominical Letter or Letters; so the Dominical Letter for 1753 is G, for 1754 F, 1755 E, 1756 DC, it being Leap Year; D being used till January 25, and C all the rest of the Year.

Having, by the last Table, found the Dominical Letter for any Year you desire, underneath it, in this Table, you have the Day of the Week each Month begins on throughout the Year; as the Dominical Letter for 1763, being found to be B, under B you find *Satur: Tuesd. &c.* find against them on the left Side, *Jan. Feb. &c.* which shews the first of *January* is on a *Saturday*, the first of *February* on a *Tuesday*, &c. If it be Leap-Year, it has two Dominical Letters, and you must use the first Letter only for *January* and *February*, and for the other Months the second Letter. As the Dominical Letters for 1764, A G, A shews only that *January* begins on *Sunday*, and *February* on *Wednesday*, but G shews the Beginnings of all the rest: The Figures with each Month shew the Number of Days, but in Leap-Year, *February* has 29 Days.

Having, by the two former Tables, found what Day of the Week the Month begins, this Table readily shews the Day of the Month. Example : The first of *February*, 1763, is on a *Tuesday*, and I would know what Day of the Month the third *Friday* in that Month is? I seek for the Square in this Table that begins with *Tuesday*, and in that Square look for *Friday*, and against it I find 4, 11, 18, 25; which are all the *Fridays* in that Month, the third answering the Question, being the 18th Day of the Month. Again, What Day of the Week is the 16th of *April*, 1764? By G, the Dominical Letter for the latter Part of the Year, I find in the preceding Table that *April* begins on *Sunday*, and looking in that Square in this Table, I find the 16th Day *Monday*.

The Prime by the Table is found after the same Manner as the Dominical Letter; the even Hundreds are to be sought for at the Top, and the Parts on the Side of the Table; and when the Number of Years sought consists of Hundreds and Parts, then the Angle of Meeting shews the Prime. Example: What is the Prime for the Year 1763? I seek for 1700 at the Top, which I find in Page 5; underneath which, and against 63, I have 16, the Prime desired. But without the Table, this is the Rule: Divide the Year of our Lord by 19, and to the Remainder after Division add 1, and the Sum is the Prime for that Year. So 1764, divided by 19, leaves 16, to which adding 1 makes 17, the Prime for 1764: And in the Table under 1700, and against 64; you will find the Prime for that Year to be 17, as before.

Having found the Dominical Letter and Prime for any Year you desire, seek for the Prime in the Square next the Dominical Letter, and in a straight Line to the Right Hand, under *From Chrismas to Shrove Sunday*, you have the Weeks and Days from *Chrismas to Shrove Sunday*; and under *Shrove Sunday*, the Day of the Month *Shrove Sunday* happens on; and in the last Column (under the Title *Easter Day*) you have the Time of *Easter*. Example, For 1763 the Dominical Letter is B, and Prime 16; seek for 16 against B, and in that Line find 7 Weeks 1 Day, the Time between *Chrismas* and *Shrove Sunday*, and that *Shrove Sunday* is on February 13, and *Easter Day* on April 3, for that Year. If, in the Bissextile Years, *Shrove Sunday* shall fall in February, as it will always do if *Easter Day* falls upon, or before, the 18th of April, then the former of the Dominical Letters for that Year is to be used for finding *Shrove Sunday*; but if *Easter Day* (which is always to be found by the latter of the two Letters) falls after the 18th of April, then *Shrove Sunday* falls in March, and is to be found by the same Letter.

N. B. When the Dominical Letters are DC, and the Golden Numbers 1, 9, 12, or 17, *Shrove Sunday* will fall on the 29th Day of February.

The preceding Tables, as their Titles express, are for finding the Moveable Feasts and Terms from the Year 1753 to the Year 1899, both inclusive; but as the Times of those Feasts and Terms may, on many Occasions, be wanted to be known prior to the Year 1753, the following Tables are retained for that End, with Examples of the Use of them; which is in every Respect in the same Manner as the others, except that the Dominical Letter of the Julian is used (and the Tables following that wherein it is found) instead of that of the Gregorian, the Golden Number being the same in both Accounts.

Example, For 1743 the Dominical Letter is B, and Prime 15; seek for 15 against B, and in that Line you find 7 Weeks 1 Day, the Time between *Chrismas* and *Shrove Sunday*, and that *Shrove Sunday* is on February 13, and *Easter Day* on April 3, for that Year. For 1744, Dominical Letters AG, and Prime 16: A shews only 6 Weeks from *Chrismas*, and that *Shrove Sunday* is February 5, and G that *Easter Day* is March 25.

To find the Sun's Place for any Day in any other Year.

For the first after Bissextile, till the End of *February*, add 46' to the Sun's Place on the same Day in the Bissextile Year; and after *February*, for the rest of the Year subtract $14\frac{1}{2}$, and the Result, in both Cases, will be his Place for the Day required. Example: Let the Sun's Place on the 10th of *February* 1765 (being the first Year after Bissextile) be required. The Sun's Place on the 10th of *February* in the Bissextile Year 1764, is $\overset{m}{m} 21^{\circ}$, 19', to which add 46', according to the former Part of the Rule, and it makes $\overset{m}{m} 22^{\circ}$, 5', the Place of the Sun sought, on the 10th of *February* 1765. Again, if the Sun's Place should be required for the 15th of *March* in the same Year 1765: From his Place for the same Day 1764, $\varphi 5^{\circ}$, 20', subtract 14,

according to the latter Part of the Rule, and the Remainder 50, 6', is the Answer sought. For any Day in the second Year after Bissextile, it is only subtracting $14\frac{1}{3}$ from the same Day in the first; and in the third Year, subtracting $14\frac{2}{3}$ from the same Day in the second, and you will have the Sun's Place at any Time desired. And to continue the Sun's Place for the Bissextile Years, if 1', 49", is added to the Sun's Place in the preceding, it will give his Place on the same Day in the following Bissextile Year. But, to prevent Fractions, add 2' for the first following Leap-Year, 3 for the second, 5 for the third, 7 for the fourth, and 9 for the fifth. And, by this Method and the foregoing Rules, the Sun's Place may be found tolerably exact for a long Time.

Note: Land is measured by the Pole, Perch, or Rod, which is usually 16 Feet and a half long; and, according to the Statute, 4 Poles in Breadth and 40 Poles in Length make an Acre, from which is made the above Table.

How to use the foregoing Table.

If you have a Piece of Land or Field, 11 Poles broad, and you desire to know how many Poles in Length will make that an Acre; against 11 in the first Column, you will find 14 9 0 is the second for the Length.

FAIRS in MARCH.

Thursday before 25th, at Bromyard. Last Tuesday, at Newn. Last Thursday, at Penniston. First Monday in Lent, at Abington, Chertsey, and Winchester. First Tuesday, at Bedford. First Thursday, at Banbury.

By the foregoing *Regal Table*, may easily be found the Year of each King's Reign corresponding to the Year of our Lord, always remembering to begin the Year of our Lord on *January 1*, and adding 11 Days to reduce it to the New Style.

Example.

I have a Deed bearing Date the 17th of *May*, in the Two and Twentieth Year of the Reign of King *Charles the Second*, but the Year of our Lord is omitted; I desire to know in what Year of our Lord the Deed was made?

I find by this Table, that King *Charles the Second* began his Reign the 30th of *January*, 1649; from whence I conclude that the 17th of *May*, in the first Year of his Reign, must be in the Year of our Lord 1649, which proves by Consequence, that the 17th of *May*, in the Two and Twentieth Year of his Reign, must be in the Year of our Lord 1671.

DIRECTIONS what is to be done each MONTH in the ORCHARD, KITCHEN, and FLOWER-GARDEN.

JANUARY.

ORCHARD and KITCHEN-GARDEN.

BARE the Roots of your Fruit-Trees, and, if the Weather be open, lay good Dung to them. Gather your Cyons for Grafts, before the Buds sprout; and cleanse your Trees from Moss. Plant Quicksets. Transplant young Fruit-Trees, and prune the old towards the Decrease of the Moon. Set young and prune your old Vines. Begin to nail and trim your Wall-Fruit. Set Beans and Pease. Sow Lettuce, Chervile, Spinach, Radish, and other Sallading, in Hot-Beds. Turn up your Bee-Hives, and sprinkle them with a little warm and sweet Water.

FLOWER-GARDEN.

Preserve your best Gilliflowers, Auriculas, early Anemomies, and Ranunculus's, from too much Wet, Frost, or Snow; as likewise your Carnations, and such Seeds as are liable either to be washed away, or over-chilled, by covering them, and striking off the Snow where it lies too thick. About the Middle of this Month, if you plant your Anemomy Roots and Ranunculus's, they will be secure without covering. Keep your Conservatory, where your Greens and nice Plants are housed, close shut, except to let in the Sun; and, if it freezes extremely, keep a small Fire of Charcoal therein. Set up Traps for Vermin; and, towards the End of the Month, earth up with fresh and light Mould the Roots of such Auriculas as have been uncovered by the Frost.

ORCHARD and KITCHEN-GARDEN.

BEGIN to graft Apples, Pears, some Plums, Cherries, &c. Cover the Roots of those Fruit-Trees the last Month left bare, and prune such of your Fruit-Trees and Vines as could not be done then; for this Month is most proper to bind, plash, nail, and dress, because less subject to Frost. Be still cleansing your Trees from Moss, and take off the Webs of Caterpillars from the Tops of Twigs, Plants, Vines, Hops, &c. Set all Sorts of Kernels and stony Seeds. Sow and set all Sorts of Asparagus, Radish, Corn-Sallads, Parsneps, Carrots, Onions, Garlicks, Marygolds, &c. Plant Cabbage Plants, Potatoes, Parsley, Spinach, and other hardy Potherbs. Steep Melon and Cucumber-Seed in new Milk 24 Hours, and sow them in a Hot-Bed, keeping the Bed covered till they appear, and then uncover it in clear and Sunshine Weather, but cover it again at Night. Still keep close your Conservatory, watering the Roots of your Orange and Lemon-Trees, &c. with Water, wherein has been Sheeps-Dung steeped in the Air or Sun, for two or three Days, taking Care not to wet the Leaves, lest you destroy your Plants.

FLOWER-GARDEN.

Secure your choice Flowers in Beds with Tiles, as soon as they appear above Ground. Air your housed Carnations in warm Days and mild Showers, setting them in again at Night. Sow Auricula-Seeds in good mellow Earth. Plant Anemonies for latter Flowers. Sow Larkspurs, &c. Plant your Boxes sown with choicest Seeds, where they may be secure from sharp Winds and violent Rains.

ORCHARD and KITCHEN-GARDEN.

GR A F T all this Month, except the Spring prove extraordinary forward, and take heed to graft your Cyon on that Side of the Stock which is least exposed to the South-West Wind, and be careful that the Rain get not into the Clefts of your young grafted Stocks. Stake and bind up weak Shrubs and Plants. Plant Peaches and Nectarines early, not cutting off the Tap-Roots, as in other Trees. Prune last Year's Grafts, and cut off the Heads of your budded Stocks. Top your Rose-Trees near a Leaf-Bud with your Knife, and cut off the dead withered Branches. Slip and set Sage, Thyme, Rosemary, Lavender, &c. Sow Endive, Succory, Leeks, Radish, Beets, Parsneps, Parsley, Sorrel, Skirrets, Bugloss, Burrage, Chervil, Celery, Smallage, Alifanders, &c. in the Beginning of the Month. Sow also Lettuce, Onions, Garlick, Purslain, Turneps, Carrots, Cabbages, Pease, Cresses, Fennel, Marjoram, &c. Transplant Medicinal Herbs. Cover your Melon Plants with Bell-Glasses, till you remove them. String your Strawberry-Beds, and uncover your Asparagus, which you may now transplant to make new Beds. By this Time the Bees sit, therefore keep them close Night and Morning, if the Weather prove ill.

FLOWER-GARDEN.

Plant Box, &c. sow Pinks, Sweet *Williams*, Carnations, Wall Flowers, Stock Gilliflowers, French Honeysuckles, Primroses, Cowslips, Larkspurs, *Indian Scabious*, &c. In your Hot-Beds sow *African Marygolds*, *Amaranthus*, *Nasturtium Indicum*, the sensible and humble Plants, &c. *African Marygolds* and *Nasturtium Indicum* will come up in a cold Bed. Transplant Gilliflowers, and other fibrous-rooted Plants, new earthing up those unremoved. Cover your choicest Tulips. Sow Stock Gilliflowers at Full Moon, to produce double Flowers. Towards the latter End of the Month, if the Weather be not too cold, you may open the Windows of your Conservatory, and by Degrees harden your Greens to bear the Air.

SOW Sweet Marjoram, Hyssop, Basil, Thyme, Winter-Savory, Scurvy-Grass, Lettuce, Purslain, Gilliflowers, Radishes, Marygolds, &c. Set Slips of Artichokes, Lavender, Thyme, Penny-Royal, Sage, Rosemary, &c. Set *French* Beans, and sow Turneps. Towards the Middle of the Month begin to plant forth your Melons and Cucumbers. Gather up Worms and Snails (all Summer) after Evening Showers. Open your Bee-hives, for now they hatch: Look carefully to them, and prepare Hives, &c.

FLOWER-GARDEN.

Continue Hot-Beds, for such exotick Plants as will not arrive at Perfection without them, till the Air and common Earth be endowed with sufficient Heat to preserve them abroad. Transplant such fibrous Roots as you had not finished in *March*; as Violets, Hepatica, Primroses, &c. Shelter your seedling Auriculas from the Sun. Take out your *Indian* Tuberoses, parting the Off-sets carefully, lest you break their Pangs; then put them in natural (not forced) Earth, placing a Layer of rich Mould beneath, and about them natural Earth, to nourish the Fibres, but not to touch the Bulbs; then plunge your Pot in a Hot-Bed moderately warm, and give them no Water till they spring; then set them under a South Wall; in dry Weather water them freely, and expect an incomparable Flower in *August*. Set out *Flos Cardinalis*. Slip and set Marjoms. Water Anemonies, Ranunculus's, and Plants in Pots, once in two or three Days, if Drought requires it. Preserve your best Tulips, Ranunculus's, Anemonies, and Auriculas, from Storms of Rain or Hail, and the parching Rays of the Sun. In fair Weather, you may venture to expose some of your tender Shrubs, but your Oranges may be left in till next Month. You may now graft Oranges, Lemons, Pomegranates, Jessamines, &c. Mow Carpet-Walks, and ply weeding and hoeing.

FLOWER-GARDEN.

Bring your Oranges forth; transplant and remove them. Transplant Amaranthus, Flos Africanus, Nasturtium Indicum, Mirabilia Peruviana, &c. from your Hot-Beds into good and rich Soil, as much as may be in the Sun. Give all your housed Plants (which you do not remove) fresh Earth at the Top, loosening the rest with a Fork, taking great Care that you hurt not the Roots, and cleanse them from the Dust they have contracted in the Conservatory. Plant your Stock Gilliflowers in Beds at Full Moon, and shade your Carnations and Gilliflowers after Mid-day. Gather your Anemony Seeds as the Dew rises, and preserve them dry. Cut the Stalks of such bulbous Roots as you find dry. Sow not any Aromatic Herbs.

Slips of Myrtle, set in a cool and moist Place, do now frequently take root. Such Gilliflowers as are now blown, keep for Seed, letting them have but a few Layers to nourish, and but few Buds; but save not any for this Purpose that break their Pods; preserve them from Wet as much as you can.

ORCHARD and KITCHEN-GARDEN.

WATER your planted Trees and Layers, prune Apricots and Peaches, saving as many of the young likeliest Shoots as are well placed. Cleanse your Wall-Fruit from superfluous Leaves. Stop the exuberant Shoots of Vines at the second Joint. Remove your large-sided Cabbages planted in *May*, to head in Autumn. Let such of these Garden-Herbs as you would save, run to Seed. Sow latter Pease, Lettuce, Chervil, Radish, &c. for young Sallading. Keep Weeds from growing to Seed, and begin your hawing. Gather the Snails from your Wall-Fruit, but pull not off the bitten Fruit, for then they will begin with others. Straiten the Entrance of your Bee-Hives, and help your Bees to kill Drones, Wasps, &c. by setting Glasses of Beer mingled with Honey for them.

FLOWER-GARDEN.

Slip Stocks and other ligneous Plants and Flowers. From henceforth to *Michaelmas* you may lay Gilliflowers and Carnations, for Increase: You may also lay Myrtles, Laurels, Jessamines, and other Greens. Clip Box after Rain. A T A B L E

For the ready casting up any Number of Farthings, Half-pence, Pence, or Shillings, where may be found by Inspection, what the Great Hundred comes to at any Rate the Pound, from one Farthing to five Shillings.

The Use and Explanation.

Example 1. *If 1 Ell of Canvas cost 7 d. 2 f. what will 500 Ells cost?*

Seek for *Seven-pence Half-penny* at the Top of the Page; then seek for 500 (the Number of Ells in that, which you will find in the third Column) and against it is 15 l. 12 s. 6 d. and so much will 500 Ells of Canvas cost at 7 d. 2 f. the Ell.

Example 2. *If a Pound of Sugar cost 4 d. 2 f. what will 2 C. Weight Averdupois cost?*

Seek in the Page whose Title is *Four-pence Half-penny*, for 224 (there being so many Nett Pounds in 2 C. Averdupois) and against it you will find 4 l. 4 s. which answers the Question.

Example 3. *If 5 C. Weight Averdupois of Soap cost 4 l. 1 s. 8 d. what did 1 Pound cost?*

Seek in the Tables till you find 4 l. 1 s. 8 d. against 560 (the Nett Pounds in 5 C. Averdupois) and at the Top of the Page you have the Answer, *seven Farthings*.

Note, That the first and third Columns in this Table are the Multipliers (where you must look for the Number of Yards, Ells, Pounds, &c. you would know the Price of, at the Rate mentioned on the Top of the Page) and the second and fourth shew the Value of the Sum multiplied in all Pages from a Farthing to five Shillings; but afterwards the first Columns only contain the Multipliers, and the other three shew the Value of the Sum multiplied: Also that the Numbers within a Parenthesis relate to the Great Hundred; as (28) (56) (84) (112) &c. are the Quarter, Half, Three Quarters, and whole Great Hundred, &c.

*The Price of any Thing, at
One Farthing.* 49

THESE Tables are so plain in themselves, that they need no Examples to illustrate them; but because Questions only of the particular Years mentioned at the Top of each Column can be resolved by them, I shall in the next Page insert a Table, whereby you may try any Number in the foregoing Tables, and answer any Question belonging either to *Forbearance*, *Discompt*, or *Purchase of Annuities* (as also to the *Rebate of Money*) at 5 per Cent. Compound Interest, for any Number of Years not exceeding 40. To do which, this is the Rule:

Multiply that Number in the Tables which stands right against the Number of the Years proposed, and in the Column to which the Question belongs, whether for Forbearance, Discompt, or Purchase of Annuities, (or Rebate of Money) by the Annuity to be forborne, discompted, or purchased, or by the Sum to be rebated, and the Product will be the Answer in Pounds and Decimal Parts.

One Example will be sufficient to explain the whole Table.

If 500 l. Annuity be forborne 21 Years, what will it amount to?

Tabular Number against 21, and	}	35.719258
under <i>Forbearance of Annuities</i>		
Annuity forborne	_____	500
	<u>17859.625000</u>	

Answer, 17859.6259000; or 17859 l. 12 s. 6 d.

And after this Manner are all Questions belonging to the following Table resolved.

To find the foregoing Fraction .3625 by this Table, you must do thus : Seek for the *Decimal Fraction* in the Table that is nearest to it (since you cannot at once find all the Figures) which is .35 ; against which, on the Left-hand, you have the Value of it, *viz.* 7*s.* subtract this from .3625, and there will remain .0125 ; which being found in the Table, against it stands 3*d.* which added to 7*s.* gives 7*s.* 3*d.* for the Value of .3625 of a Pound.

And thus you may find the Value of any *Fraction* of a Pound by this Table.

Exactly calculated from ONE POUND to
TEN MILLIONS of MONEY, to the
THOUSANDTH PART of a Penny.

After the Rate of THREE, FOUR, FIVE
and SIX *per Cent. per Annum.*

By ISRAEL FALGATE,
Of the BANK of ENGLAND.

DIRECTIONS.

NOTE, that by these small Tables is effected all that can be performed by those larger which are calculated from Day to Day throughout the Year, and that to a larger Sum than any yet extant, no Tables hitherto published exceeding Ten Thousand Pounds for one Year, and these extending to above Twenty-five Thousand; as appears manifestly, because if you multiply 25000 by 365 Days, the Product will amount to but 9,125,000, and these Tables are calculated up to Ten Millions.

The Use whereof may be understood by observing this Rule:

Always to multiply the Sum by the Number of Days, or the Number of Days by the Sum; and the Interest of the Product may be found in these Tables, as is apparent by an Example, *viz.*

To find the Interest of 5654 *l.* for 154 Days, at the Rate of 6 *per Cent. per Ann.* multiply as before directed, and the Product will be 8 Hundred and 70 Thousand 7 Hundred and 16 Pounds: And that Sum for One Day required the same Interest as 5654 *l.* doth for 154 Days, which will appear by the Tables.

Under the Title

	Of Principal.	Of Interest.
Against { 800000 is <i>l.</i>	131	: 10 : 1 643
70000 is <i>l.</i>	11	: 10 : 1 643
700 is <i>l.</i>	—	: 2 : 3 616
10 is <i>l.</i>	—	: — : 0 394
6 is <i>l.</i>	—	: — : 0 236
	870716	143 : 2 : 7 532

Which Sums being added, sheweth, That 870716 *l.* Principal for 1 Day at 6. *per Cent.* requireth — *l.* 143 : 2 : 7 $\frac{532}{10000}$, which is the true Interest of 5654 *l.* for 154 Days.

And whereas there is a Difference in the common Way of computing Quarterly Interest by 3, 6, and 9 Months, and by single Days, the same may be thus rectified, allowing each a true Proportion of the Year.

Year, being Three Hundred Sixty Five Days, *viz.*
 3 Mon. 9 Days and $\frac{1}{4}$, 6 Mon. 182 Days $\frac{1}{2}$, 9 Mon.
 273 $\frac{3}{4}$. To either of which, if you add the remain-
 ing Days that exceed 3, 6, or 9 Months, and multi-
 ply the Sum by the Number of Days, and add $\frac{1}{4}$,
 $\frac{1}{2}$, or $\frac{3}{4}$, of the principal Sum, for $\frac{1}{4}$, $\frac{1}{2}$, or $\frac{3}{4}$, of a
 Day, to the said Product of whole Days, the Interest
 being found in these Tables, as before directed, will
 agree with the common, though uncertain Way of
 reckoning, by 3, 6, or 9 Months; by Reason they
 differ, one from the other, 3 Days in 3 Months;
 one 3 Months containing but 89, and others 92
 Days.

Principal

By which the Quarterly Interest of all Sums of Money may expeditiously be found at the following Rates, *viz.*

1, 2, 3, 4, 5, 6, 7, 8, 9, and 10
per Cent. per Annum.

The Rule is, Multiply the Sum proposed, by the Interest in the Table, under the Time, and against the Rate required; and divide the Product by 100, with cutting off two Figures to the Right-hand, and you have the Interest in Shillings: Then multiply the Remainder of the Shillings by 12, and divide the Product by 100, it will give you the Pence; and the Remainder of them multiplied by 4, and divided by 100, will give you the Farthings.

EXAMPLE.

172 Pounds for 9 Months, at 6 per Cent. per Annum.

Multiply by 172 the Principal,

Farthings	2	40

By which it appears, the Interest is 154 Shillings, 9 Pence, two Farthings, and $\frac{4}{100}$ of a Farthing.

or, $l. 7 : 14 : 9 \frac{1}{2} \frac{2}{5}$.

Quarterly Interest may also be found in this Book, by proportioning the Time truly thus, reckoning,

91 Days and $\frac{1}{4}$	}	to be	{	3 Months.
182 Days and $\frac{1}{2}$			{	6 Months.
273 Days and $\frac{3}{4}$			{	9 Months.

Which are truly Quarterly Proportions of a Year, viz. $\frac{1}{4}$, $\frac{1}{2}$, and $\frac{3}{4}$ of 365 Days.

To either of them add the Days that exceed 3, 6, or 9 Months, and proceed as directed in the Beginning of this Book, you will have the Interest of the Quarters, and Days, at one Operation, which the true Number of Days, taken as they fall, will differ from, by Reason three Months contain sometimes but 89, and at other Times 92 Days.

A SCHEME of the PROPORTIONS the several COUNTIES in ENGLAND paid to the LAND-TAX in 1693, and to the SUBSIDIES in 1697, compared with the Number of Members they send to Parliament.

In this Scheme the Proportions are thus considered, *viz.* that as the whole Kingdom sends 513 Members to Parliament, so the whole of each Tax is divided into 513 equal Parts; and the

1st Column shewing the Names of the County; the 2^d Shews how many of the 513 Parts each County paid to the *Land-Tax* in 1693.

3^d How many of the 513 Parts each County paid to the *Subsidies* in 1697; and

4th How many of the 513 Members each County sends to Parliament.
